## Bombardiere - Fork

A lot more than just a beefier version of a road fork, the Bombardiere is designed for urban freestyle riders and tricksters. Short offset for easier barspins, peg-friendly dropouts for grinding options and clearance for big tires to eat up those hard landings. The triple butted chromo tubing keeps things light, but very strong. Now's the time to try those tricks you were previously scared to try- have faith, be strong, nail the landing!

- 1.125" steerer tube
- 24mm offset
- 410mm axle to crown
- Tire clearance for up to 45c tire
- Full chromo triple butted tubing w/ CNC Steerer
- Peg compatible dropouts
- Brev. M laser etched logo
- Black ED finish on legs and steerer

## Robusto - Fork

If you're blasting through the urban jungle, swerving through traffic and plowing through potholes then you need the Robusto fork. Designed to be strong enough for urban combat without turning your thoroughbred into a farm horse. Full chromo for a long life and stiffness. Ride with style AND confidence.

- 1.125" steerer tube
- 40mm offset
- 380mm axle to crown
- Tire clearance for up to 32c tires
- Full chromo
- Brev. M laser etched logo
- Black ED finish on legs and steerer

## Slittata - Tire

Slittata is Italian for "skid" and that's exactly what these tires are designed for. We use a deeper rubber for extra wear, but we also use strong casing that is reinforced with a skid resistant belt underneath. When used with our skid-proof tube, you've got armor plating for your wheels.

- 700x28c
- Folding bead
- Puncture resistant belt
- Colors- Red, white, black

## Skid-proof - Tube

This heavy duty tube is just the ticket for urban skid monsters; once you burn through the tire casing and get through the threads, you still have a little life to get home. Thicker rubber on the contact area of the tube gives you just enough extra security to reach for another tube... rather than skidding immediately to a spooky stop.

- Heavy duty butyl tube
- Presta valve
- 48mm valve stem

## 32h & 36h - Wheels

Each of our wheelsets is purpose built. The 32 hole wheels use a 32mm deep rim and hubs with cutout flanges and sealed bearings to keep things a little lighter and hassle free. Our 36 hole wheels use a deeper 40mm rim and hubs with solid flanges for increased strength and loose bearings for easy repairs and rebuild capability. Each wheelset serves a purpose while having incredible good looks. The 32 hole wheels are excellent every day wheels and the 36's are perfect for heavy, stronger or more aggressive riders. Either will keep you spinning worry free, whether you choose to run fixed or free with the rear flip/flop hub.

As we like to say around here- worry less, ride more!

### 32h:

- Sealed bearing high flange hubs with cutouts
- 32mm deep section rims with machined braking surfaces
- 14g spokes, 3 cross, alloy nipples
- Color options:  
(Rim, Nipple, Spoke, Hub);
- Blue/Black/Black/Black
- White/Black/Pink/White
- Red/Black/Black/Red

### 36h:

- Loose ball bearing high flange hubs without cutouts
- 40mm deep section rims with machined braking surfaces
- 14g spokes, 3 cross, alloy nipples
- Color options:  
(Rim, Nipple, Spoke, Hub);
- Gold/Black/Black/Gold
- Pink/Black/White/Pink
- White/Black/Black/Black

## Riser Bar - Handlebar

Just enough rise and just enough sweep to be perfect for almost any type of urban riding. If you're doing barspins or just flying through traffic, these bars rock mightily!

- 25.4mm diameter
- 540mm width
- 6000 series aluminum
- Painted with water transfer logos and clear coat
- 30mm rise
- 6 degree sweep
- Colors- Blue, Red, Pink, White, Silver

## Flat Bar - Handlebar

Made of custom drawn double butted alloy for light weight and strength and with the simplest of all possible shapes- dead flat, dead straight, dead sexy.

- 25.4mm diameter
- 500mm width
- Custom drawn, double butted 6000 series aluminum
- Painted with water transfer logos and clear coat
- ZERO rise
- ZERO sweep
- Colors- Blue, Red, Pink, White, Silver
- 175g

## NoFlange - Grip

If you're looking for the definition of a cool, yet simple grip- you just found it. Paired with the Flat Bar, you've got yourself a super streamlined combo.

- Colors- Blue, Red, Black, Orange, Yellow, Pink, Purple, Gold Glitter
- 125mm width
- 91g (pair)

## Track - Grips

We took the traditional rubber track grip and made it better- a lot better. With our knurled and triangulated grip pattern, you can't get a better grip for riding with or without gloves. The small diameter grip doesn't squirm under force and the deep triangle grooves provide massive amounts of control.

- Traditional Keirin style
- 173mm length
- Colors- Blue, Red, Black, White, White/Black "smoke"
- 70g (pair)

## Drop Bar - Handlebar

400mm wide at the flat, with a thoroughly vintage flare and drop. Our bars are perfect for blasting through the streets with style and a touch of attitude with the distinct graphics.

- 26.0mm diameter
- 400mm width
- 6000 series aluminum
- Painted with water transfer logos and clear coat
- 4 colors- Blue, Red, Pink, White
- 311g

## Brev. M - Headset Spacers

Aside from our chainring bolts, there really isn't a better way to add just a splash of extra awesomeness to your bike. The spacers and top cap provide just enough color to whisper, "hey, check me out."

- 6061 aluminum
- Laser etched logos
- 1 ea- 5mm, 10mm, 20mm spacers and top cap
- Colors- Blue, Red, Pink, Green, Orange
- 42g (set)

## Flange - Grip

The softer rubber and deeply patterned grip gives you tons of control and a bit of comfort in the hands. Perfect for riders who want control without having to wear gloves for a secure grip.

- Colors- Blue, Red, Black, Orange, Yellow, Pink, Purple
- 130mm width
- 132g (pair)

## CNC - Pedal

CNC'd from extruded 6000 series aluminum for light weight and strength, these gorgeous beauties are designed to work with toe clips or wide Velcro straps. The tooth profile is aggressive for use with sneakers, but not total shin shredders.

- Sealed bearing
- Chromoly steel spindle
- CNC 6000 series alloy body
- Super light weight
- Anodized black with laser etched logo

## Retro - Quill Pedal

Like the old touring pedals of years ago, these pedals are perfect for all day riding. The slightly more aggressive cages are perfect for riding around in your favorite pair of sneaks' without having to worry about slipping. 100% toe clip and strap compatible.

- Serviceable loose ball bearing design
- Solid steel spindle
- Alloy body and cage with laser etched logo on end cap
- Works with single, double or Velcro straps
- Works with toe clips
- Colors- Black, Silver, Orange, Green, Pink, Red, Blue
- 353g (pair)

## Steel - Toe Clips

Our toe clips are strong and much longer lasting than plastic toe clips that get ground to oblivion and eventually break. Besides- you just can't argue with the cool that comes with chrome.

- Chrome plated steel
- Works with single or double straps
- Size Large for sneaker compatibility
- 92g (pair)

## Bullo - Plastic Pedal

Similar to the BMX plastic pedals on the market that are so popular, but designed specifically for use by aggressive urban riders. The side "windows" of the pedal body are compatible with Velcro foot retention straps without having to break out any tools and grind the bodies away. The grip is aggressive enough to work with rubber soled shoes without ripping the skin off your shins. With or without straps, the Bullo pedals are tough- just like you.

- Resin plastic body
- 9/16" steel pedal spindle  
w/ loose ball bearing
- Colors- Black, White, Glow in the dark

## Double - Toe Strap

Inspired by traditional Keirin racing leather straps, our straps are made to be tough and last a lifetime. Aggressive riders will especially appreciate the added security, as well as the stylish good looks.

- Real leather with screened logo
- Chrome plated hardware
- Colors- Black, Brown, White
- 425mm length
- 102g (pair)

## Sellino - Saddle

Classic styling with steel rails to handle aggressive riding, deep sides for comfort when riding in jeans and just enough padding to keep your backside smiling. Just enough flash to be eye-catching, without being obnoxious.

- Strong 7mm steel rails
- Synthetic leather cover
- Colors- Stitch Blue, Stitch Red, Stitch Black, Orange/White, Black/Green, Argyle

## Brev. M - Chainrings

Light and stiff chainrings for urban cycling. Made with a 130BCD to work with numerous cranks, as well as our own, the Brev. M chainrings have a machined back to minimize weight and maintain stiffness for heavy duty urban riding conditions. Sizes range from 42t to 50t in a host of the best colors.

- 130 BCD
- 6000 series aluminum with CNC teeth, machined back and laser etched logos
- Sizes- 42, 44, 46, 48 and 50T
- Colors- 42, 44, 46T- Blue, Red, Pink, Green, Orange, Black, Silver
- 48T- Blue, Red, Green, Orange, Black, Silver
- 50T- Blue, Black, Silver
- 105g (46T)

## Brev. M - Crankarms

We make our cold forged crank arms in a 130BCD so that they will work with lots of different chainrings- though ours do a perfect job. The arms are available by themselves so that you can pick your own ring and chainring bolts and truly customize things to meet your taste.

- 165 and 170 lengths
- 130 BCD/ 5 bolt
- Cold forged with laser etched logos
- Square taper/ JIS bottom bracket interface/ 103mm recommended width
- 4 colors- Blue, Red, Black, Silver
- Sold without ring
- 509g (170mm)

## Classic - Saddle

Some things never go out of style- and for good reason. The shape of our saddles is a throwback to the classic saddles of the 80's and earlier. The slight curve to the shell provides the perfect perch for hours of saddle time and the padding is thick enough to be comfortable without being squishy or squirmy. Steel rails are meant to be strong and prevent bending on hard landings.

- Strong 7mm steel rails
- Classic, retro shape
- Smooth/ embossed and "perforated" (dimpled cover)
- Synthetic leather cover
- Colors- White, Black, Brown
- 334g

## Chainring - Bolts

If you just want a little touch of color, then these bolts are the ticket. Made with a short bolt and nut for single chainring use.

- Designed to work with single chainring only
- 5mm bolt size
- 7g (set)
- 8.5mm total length
- Colors- Black, Blue, Green, Orange, Pink, Red, Silver
